**Cairo Trading,** Data Entry Oct 2021 – Apr 2022

- Corrected data entry errors to prevent duplication or data degradation.
- I was responsible for entering invoices into Odoo ERP system in time with high quality.

### CERTIFICATES

---

**HackerRank SQL certification** | **Automation Developer Associate Training** — UiPath Academy |

**Automation Developer Professional Training** — UiPath Academy |

**Advanced Bot Developer (Automation 360)** | **Business Analyst (Automation 360)** |

**Automation Anywhere Certified Advanced RPA Professional Prep. (Automation 360)**

## SKILLS

---

- C#(ASP.Net Core, LINQ & Entity Framework, MVC Core & Web API)
- SQL (Microsoft SQL Server, PostgreSQL, MySQL)
- Concepts(OOP, Data Structure. Algorithms, SOLID Principle, Machine Learning)
- Other(RPA Development, PowerBI)
- Java(Spring Core, Spring Boot, Spring Data, Hibernate, Spring MVC, Servlet)
- DevOps Tools(Docker, Ansible, Terraform, Kubernetes, CI/CD, Pipelines, Jenkins)
- Front End(Angular, HTML 5, CSS 3, JavaScript, TypeScript, Bootstrap)

## PROJECTS

---

### ACME\_Calculate Client Security Hash

Mar 2024 – Mar 2024

- Open ACME System 1, log in, and access the Dashboard to view Work Items; for each WI5 activity, retrieve client details, generate SHA1 hash, and update status to "Completed" with the obtained Security Hash.
- Using UiPath and REFramework
- <https://github.com/IslamSaleh2/Calculate-Client-Security-Hash>

### ACME\_Verify Account Positions

Mar 2024 – Mar 2024

- Log in to ACME System 1 and open ACME System 3; compare account data with System 3 transactions for WI1 activities, marking completion if matched, otherwise note discrepancies.
- Using UiPath and REFramework
- [https://github.com/IslamSaleh2/ACME\\_Verify\\_Account\\_Positions](https://github.com/IslamSaleh2/ACME_Verify_Account_Positions)

### Vezeeta Website

Feb 2024 – Mar 2024

- Vezeeta is a healthcare platform that facilitates booking appointments with doctors and other healthcare providers.
- Using(C#, MVC, SQL Server, Bootstrap, HTML5, Javascript)
- <https://github.com/A7mdMagdy/Vezeeta>

### Resturant Pizza Website

Jan 2024 – Jan 2024

- Introducing the all new "Pizza Egypt" app for easy ordering and great exclusive deals.
- Using(Angular, HTML5, CSS 3, Bootstrap, Firebase, Json Server).
- <https://pizza-34619.web.app>

### BabyCare Website & elibrary Website

Sep 2023 – Oct 2023

- A software product which provides solution for baby health, baby food, baby tips, baby products I A library management software
- BabyCare using(JSP, JDBC. Javascript, MySQL) & elibrary using(Servlet, HTML, CSS, Bootstrap, MySQL)
- <https://github.com/IslamSaleh2/BabyCare> I <https://github.com/IslamSaleh2/elibrary>

### Employee Manager Website & Server Website

Jul 2023 – Jul 2023

- App to manage employees and servers
- FullStack using (Spring Boot, Spring data jpa and Angular CLI)
- [https://github.com/IslamSaleh2/Emp\\_Manager\\_App](https://github.com/IslamSaleh2/Emp_Manager_App)
- [https://github.com/IslamSaleh2/Server\\_App](https://github.com/IslamSaleh2/Server_App)

### DeepFake Detection, Graduation Project

Sep 2020 – Jul 2021

Our project aim to determine 4 types of DeepFake like GAN. Splicing.Morphing and Copy-Move forgery.

- Grade (Excellent)
- Technologies used in It are Python, TensorFlow. Keras and TKinter for GUI.
- <https://github.com/IslamSaleh2/DeepFake-Image-Detection>
